TOR NA DO

TORNADO YIKAMA SİSTEMİ

Tornado hijyenik, temiz, devrimci bir sistemdir. Tornado sistemin farkı standart WC' ler de ki gibi geleneksel kenarların olmamasıdır. Tek delikli Tornado yıkama sistemi suyun yüzeyi daha etkin şekilde temizlemesine olanak sağlar, gürültüyü minimize eder. Standart bir klozetin 72 db gürültü seviyesine sahip olduğu düşünülünce Tornado yıkama sisteminde bu oran 64 db seviyelerine kadar düşmektedir.

TORNADO FLUSHING SYSTEM

Tornado is a hygienic, clean, revolutionary system. The difference of the Tornado system is that the traditional edges like in standard WCs is not available. The single-hole Tornado washing system allows the water to clean the surface more effectively, minimizes noise. Considering that a standard toilet bowl has a noise level of 72 db, Tornado washing system, this rate drops to 64 db levels.

RIM LESS

RIMLESS YIKAMA SİSTEMİ

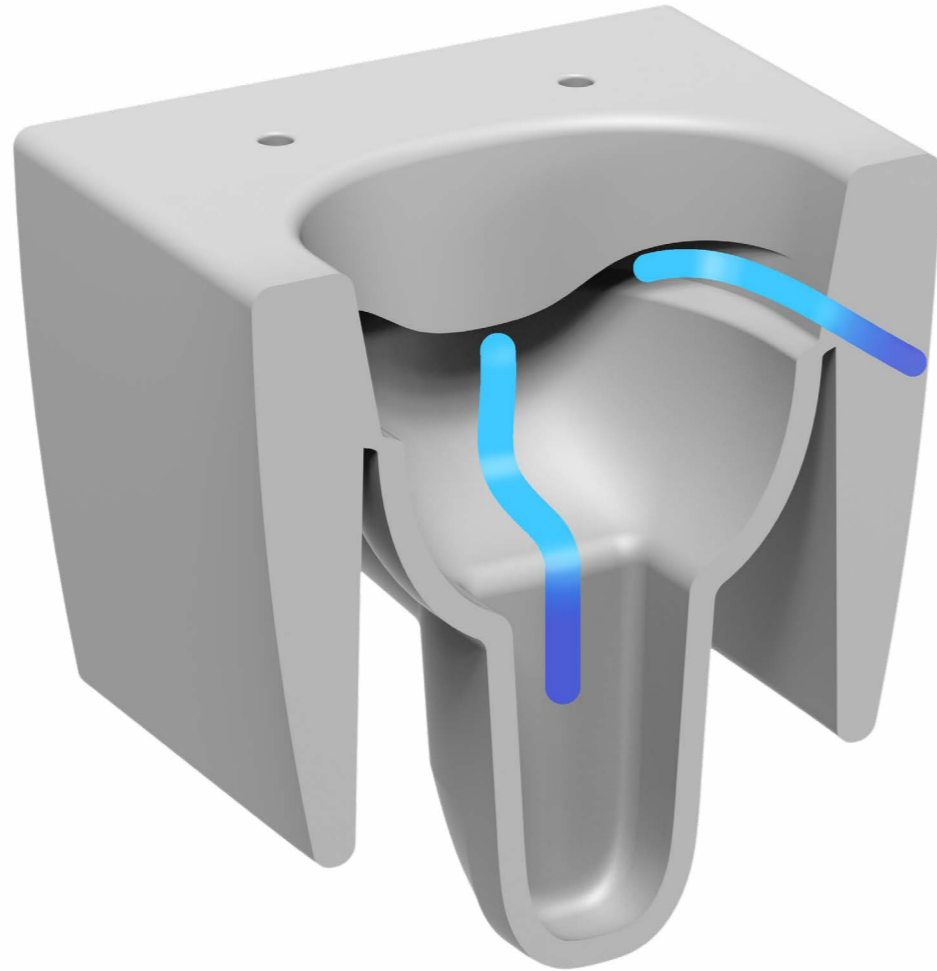

Çerçevesiz bir tuvalet, geleneksel bir tuvalette suyun normalde akacağı, kenarı olmayan bir tuvalettir. Suyun aşağı doğru akması yerine, çerçevesiz bir tuvalet, suyu kenara ve klozetin çevresine doğru hiçbir noktayı kaçırmadan püskürten bir yıkama sistemine sahiptir.

Çerçevesiz bir tuvalet, sifon sırasında suyun kaseye girme şeklini değiştirir. Suyu yanlardan yatay olarak kaseye iten, arkaya monte edilmiş bir vana kullanır. Atıkların girip sıkışabileceği gizli çatlaklar yoktur. Her seferinde daha temiz bir yıkama sağlar.

RIMLESS TECHNOLOGY

A rimless toilet is a toilet without a rim where the water would normally flow from in a traditional toilet. Instead of water flushing down, a rimless toilet has a flushing system that shoots water towards the edge and around the toilet bowl leaving no spots missed.

A rimless toilet changes the way water enters the bowl during flushing. It uses a rear-mounted valve that pushes water into the bowl horizontally along the sides. There are no hidden crevices for waste to enter and get stuck. It produces a cleaner flush every time.
